

# Learning Programming Languages Websites

---

I recommend the following resources to help you when you have language-specific questions:

W3Schools: This website provides a wealth of content for learning a variety of programming languages and tools:

- [Java Tutorial \(https://www.w3schools.com/java/default.asp\)](https://www.w3schools.com/java/default.asp)
- [Python Tutorial \(https://www.w3schools.com/python/default.asp\)](https://www.w3schools.com/python/default.asp)

Geeks for Geeks: This is another site I highly recommend. It provides a wealth of information, code snippets, and excellent explanations of concepts.

- [Java Tutorial \(https://www.geeksforgeeks.org/java/java/\)](https://www.geeksforgeeks.org/java/java/)
- [Python Tutorial \(https://www.geeksforgeeks.org/python-programming-language/\)](https://www.geeksforgeeks.org/python-programming-language/)

Python-Specific websites:

- [Real Python \(https://realpython.com/\)](https://realpython.com/) and [Real Python Tutorials \(https://realpython.com/tutorials/all/\)](https://realpython.com/tutorials/all/). I really like this site. There is a paid subscription model, but everything you need for this class is available freely.
- [The Official Python Reference \(https://docs.python.org/3/reference/index.html\)](https://docs.python.org/3/reference/index.html)
- [Python Tutorial provided by Python.org \(https://docs.python.org/3/tutorial/index.html#tutorial-index\)](https://docs.python.org/3/tutorial/index.html#tutorial-index)
